# KIP Print

KIP Print network printing software is an easy to use application designed to provide operators with a fast and accurate means of producing high quality print sets from all types of wide format digital files.

An intuitive ribbon style interface with an emphasis on job building; featuring column browsing, color thumbnail previews and total preflight control. Color and B&W documents are efficiently selected for printing in the preferred sequence with the ability to remove white borders from images and designate custom output preferences before print submission.
