

KIP Color TWAIN

Introduction

TWAIN is a standard software protocol that regulates communication between software applications and the KIP scanners.

The KIP Color TWAIN software allows user to utilize their current application that has TWAIN capabilities to capture data necessary and produce valid output files.

KIP Color TWAIN

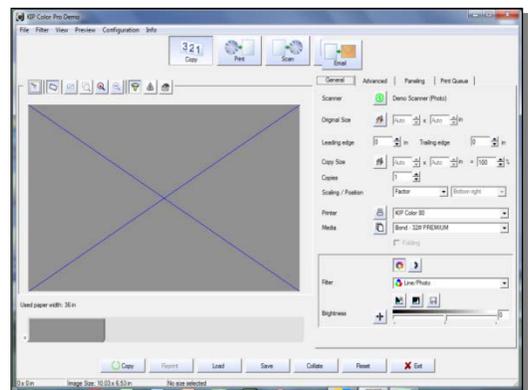

Installation

The following are general steps of the usage of KIP Color TWAIN software.

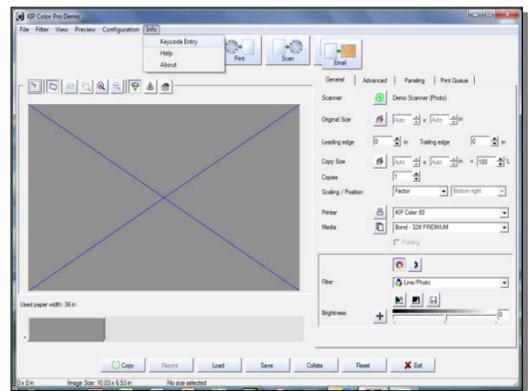

Please note that it is necessary to have the KIP Color Advanced or Pro 7.4 version (or Higher) software installed with the appropriate Key Code to unlock this functionality.

Setting up and using KIP TWAIN.

1. To utilize the KIP TWAIN functionality, you must first load KIP Color Advanced, or KIP Color Pro.
2. Once Loaded open the application.
3. Next select the Info tab.

4. Next Select Key Code Entry.

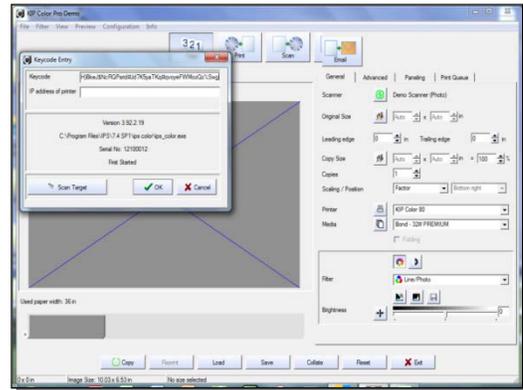

5. The software will build the scanner list.

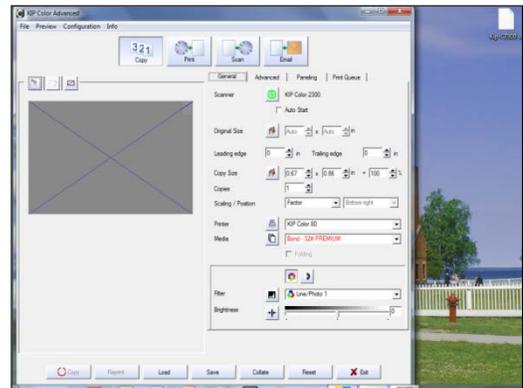

KIP Color TWAIN

6. Enter the key code by typing it in, or scanning the key code target.
7. Select the OK button and the Color software will restart.

8. When the software restarts, the top left corner should read KIP Color Advanced. The Scanner should also be available and the button next to it should be green, indicating it is active.

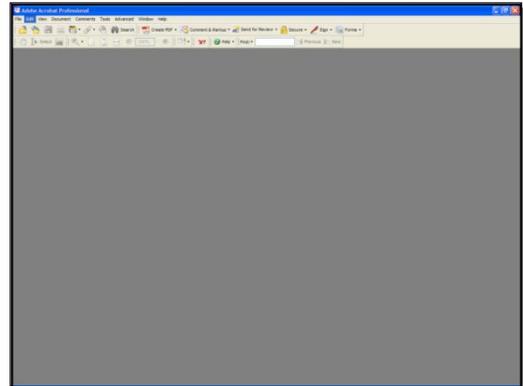

9. Close the KIP Color Advanced software, installation is now complete.

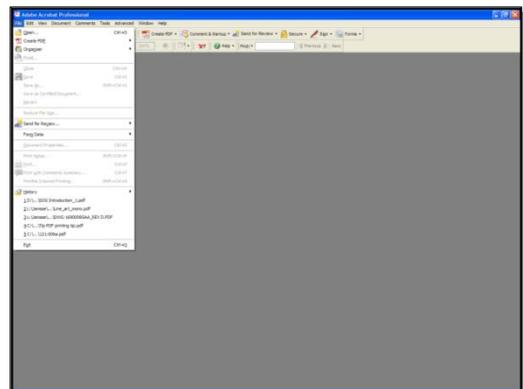

Using KIP TWAIN.

Utilizing the KIP TWAIN software requires a third part application that allows the usage of a TWAIN driver. In this example we will be using Adobe Acrobat Professional (Pro version needed for TWAIN Scanning).

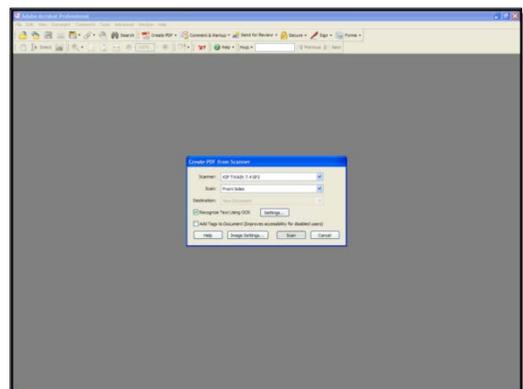

1. Open the application that will be used for TWAIN scanning.

2. Select File, and then select Create PDF.

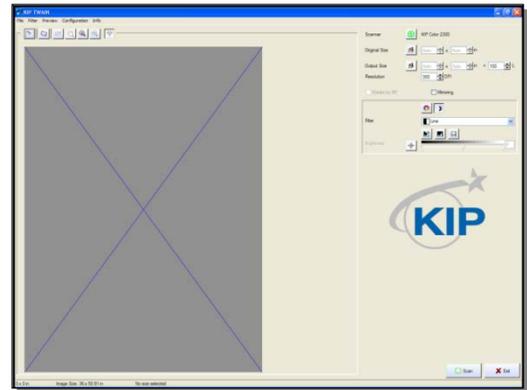

3. A box will open allowing the selection of the scanning device to be used.
4. Select Scan to launch the TWAIN scan software.

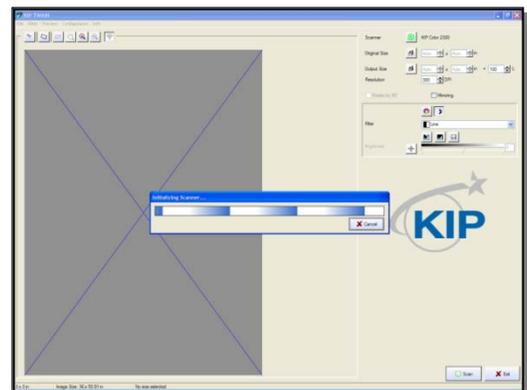

KIP Color TWAIN

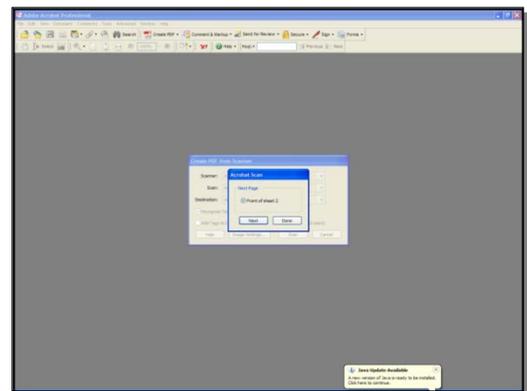

- When the software opens, make appropriate changes in this example Black and white has been chosen but color can also be selected.

- Insert the file into the scanner and select the Scan button.
- The scan process will begin.

- When it is complete a box will open, asking if another page will be scanned, if no, select done.

9. The newly scanned PDF will open and can now be saved.
10. Select the File Tab and then select save as.

11. Select the desired location and file name and select save.
